Engcotec, founded in 1987 by Engineer Mr. Samak, specialized in renewable energies, and especially in photovoltaics. Today, after more than two decades of international experience, Engcotec has built up a successful and solid business around PV systems. The company's focus is the design, manufacture and execution of projects in the field of renewable energy (especially in solar energy), PV technology systems, building-integrated PV systems and the use of solar energy in developing countries as a means of supporting the countries' development.
